Hello Edith

I would like to show my support to the City in regard to the Depot re alignemnt project.

As you know I have been a property owner in Downtown for over 20 years and am about to celebrate 30 years in business in Morgan Hill as of April 2017. I have seen many of years without direction of the Downtown. The last few years I have been so encouraged that the City is following through with the General Plan for the Downtown.

This project is one of them...

So excited that parking and traffic circulation is completely thought out by the city planners. Almost overdone in my opinion. I understand with each project there are challenges but without the pains there will be no gains.

It is necessary to remove the industrial use from our Downtown to complete the vision and what a great opportunity before you to do so and push the success of the Downtown corridor to a whole other level.

Thank you for the hard work you must all put into making these projects happen.

Morgan Hill City Council:

When choosing a location for our business, Orangetheory Fitness, the ideas and vision Downtown Morgan Hill had in place were the number one selling point for choosing to go downtown as well as to move forward with our investment in Morgan Hill in general. We feel Morgan Hill is doing a great job in selecting businesses and housing alike for the area. Projects like this will be what create a lasting environment for our business as well as others to thrive into the future.

While I am sure you get some come complaints regarding housing in Morgan Hill you must take into account the Downtown area is an entity of its own and should be regarded as such. In order to drive more business to the area we feel projects like this are exactly what is needed.

Sincerely,

**Ty Little**  
Franchise Owner  
**Orangetheory® Fitness**  
**Sunnyvale / Morgan Hill, CA**
